Industry placements are good for business!

Offering an industry placement to a young person isn't just providing them with meaningful work experience – it also has lots of benefits for you, the employer.

The benefits:

- developing the supervisory and management skills of your current workforce
- enhancing your public profile by supporting your local community
- accessing a pool of hidden talent – people who offer enthusiasm and a fresh perspective to your business
- promoting workforce diversity

Choose from:

T-levels – The new T-level qualifications (on a par with A-levels) are aimed at high achievers who want to develop career-specific practical and technical skills. By offering an industry placement to a T-level student you are training up tomorrow's workforce as well as benefiting from an enthusiastic and highly capable resource.

Traineeships – These programmes provide young people with the skills, experience and confidence to succeed in employment. A Traineeship placement helps prepare the young person to access a relevant Apprenticeship.

All our students are taught by industry specialists and have access to cutting edge facilities in which to develop their skills.

Helping companies flourish by developing a highly skilled workforce
