

Citrix Workspace install on a Mac device.

- In a web browser, navigate to [this page](https://www.citrix.com/downloads/workspace-app/mac/workspace-app-for-mac-latest.html) and press “Download Citrix Workspace app for Mac” or copy and paste the URL into a web browser address bar
<https://www.citrix.com/downloads/workspace-app/mac/workspace-app-for-mac-latest.html>

- Press the download viewer in the top right of the browser window and open the CitrixWorkspaceApp.dmg file. Then select “Install Citrix Workspace”.

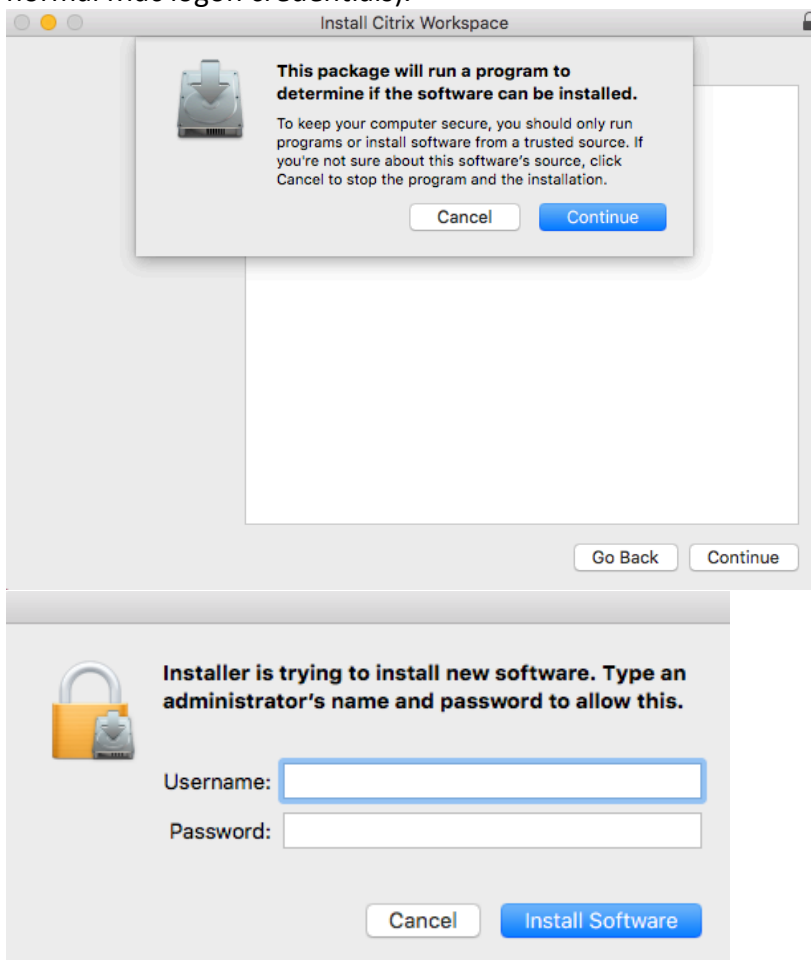

Install Citrix Workspace

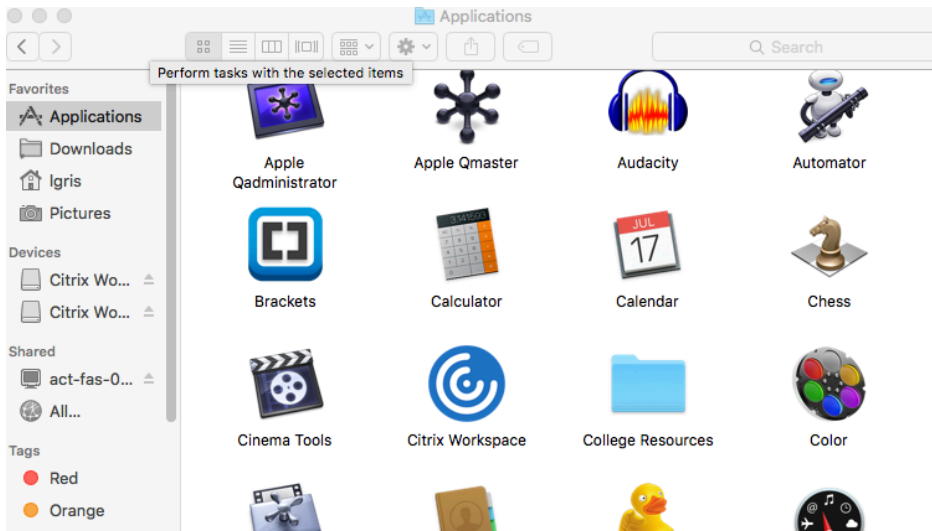

Uninstall Citrix Workspace

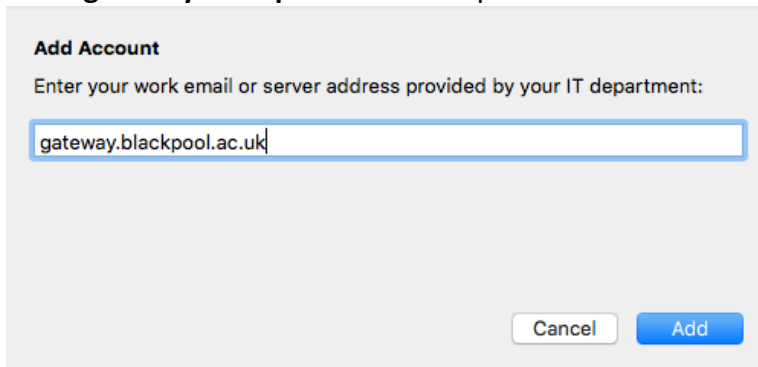

- A window will appear, select continue and agree on all pages. You will be prompted to enter the username and password of the administrator on the Mac (Usually your normal Mac logon credentials).

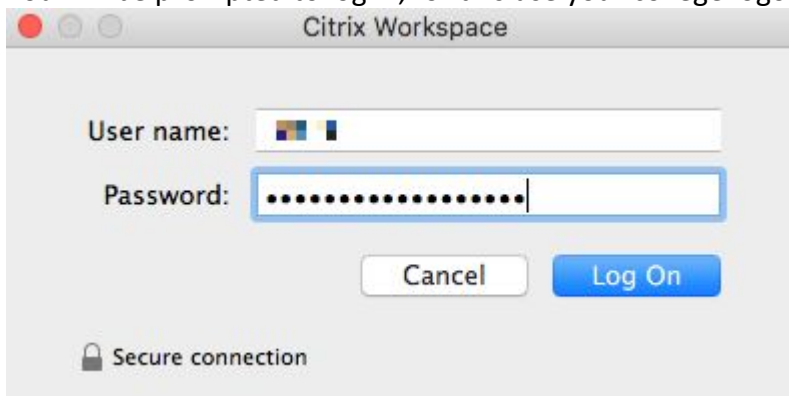

- Press close once "The installation was successful" appears. Open a new finder window and navigate to "applications". You should find the Citrix Workspace app there – launch this.

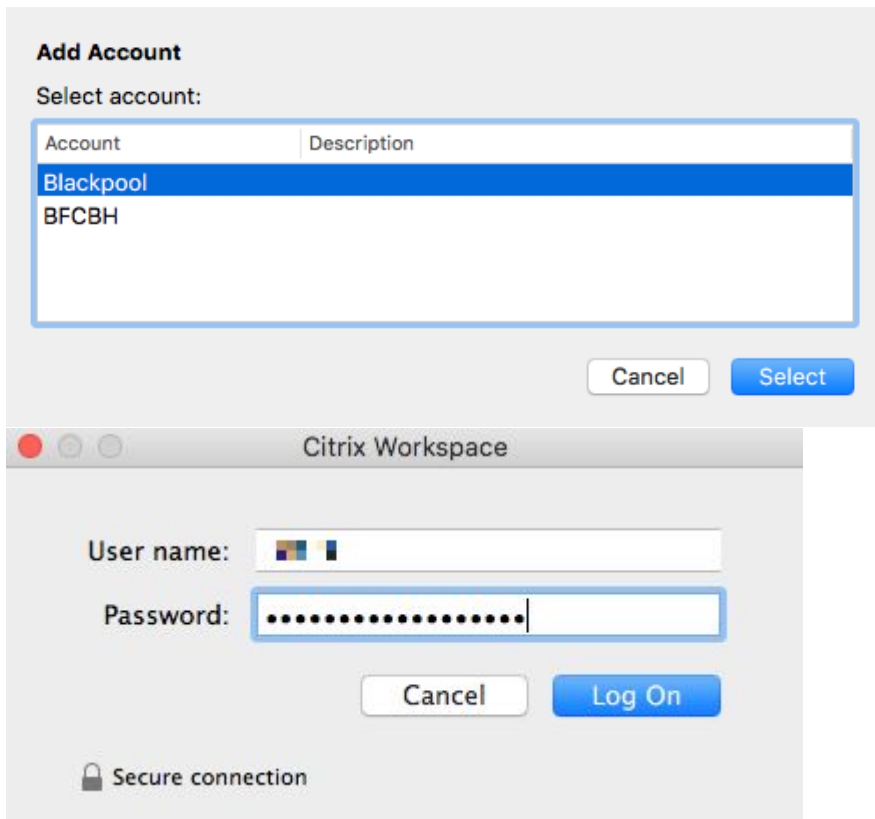

- Upon opening, you will be prompted to “Enter your work email or server address”. Enter **gateway.blackpool.ac.uk** and press add.

- You will be prompted to log in, for this use your college logon.

- You will then be given 2 options for which account to add. Choose “Blackpool” and then press select. A prompt for you to log on will appear, log in as normal with your college credentials.

- To then finally launch Citrix, select the Windows 10 Experience.
