WELCOME

Welcome to Blackpool and The Fylde College and to the Teaching and Learning Support (TLS-2017) programme.

This **Programme Handbook** aims to provide you with the key information you will need to settle into and get the most out of your programme of study here at the College leading to successful completion of your programme. It will provide you with an overview of the programme content, how individual modules are organised and delivered, how and when you will be assessed and how overall grades final results are determined. In addition there is information on the help and general support available to you as well as making it clear what you need to do if you should encounter any specific difficulties in progressing as planned on the programme.

More information is available on the B&FC [Student SharePoint](#) site which includes an overview of the College partners and how they will support you on your journey, alongside key information on College facilities, student representation and events you can get involved in. Guidance on term times, Travel to College, Attendance Expectations can be accessed through the College website and Canvas, your virtual learning environment (VLE).

It is strongly recommended that you refer to your **Programme Handbook** and **Student SharePoint** to ensure that you get the most out of the time you will have invested in participating in your valuable and hopefully enjoyable learning experience.

STUDYING WITH B&FC FROM SEPTEMBER 2020

B&FC has implemented a series of wide-ranging measures ensuring you will enjoy the best possible learning experiences in the safest, healthiest way.

From September 2020, students will continue to be provided with a vibrant learning environment using a mixture of campus-based and online teaching in line with the latest Government advice. While many lectures and assessments will mostly take place online, there will be some socially-distanced small-group teaching sessions and limited risk assessed access to laboratories, arts studios, performance spaces and specialist teaching facilities.

More information can be found on the B&FC website through the following links:

- [Studying with B&FC from September 2020](#)
- [HE Student FAQs](#)

We appreciate that as students in order for materials to be fully accessible you may have a preference for a specific font size or colour of text/paper. To ensure that your needs are considered this handbook is available electronically.

THE FRAMEWORK FOR HIGHER EDUCATION QUALIFICATIONS (FHEQ)

The Framework for Higher Education Qualifications (FHEQ) ensures the comparability of Higher Education qualifications in England, Wales and Northern Ireland. The framework describes the achievement represented by qualifications and the various awards which may be granted by a Higher Education provider with degree awarding powers. All students pursuing Higher Education programmes at Blackpool and The Fylde College are awarded qualifications aligned to the FHEQ upon successful completion of their programme.

Level	4	5	6	7	8
FHEQ Level	Certificate (C)	Intermediate (I)	Honours (H)	Masters (M)	Doctoral (D)
About this level of qualification	<p>Level 4 These qualifications are work-related (vocational) higher education qualifications. While bachelors degrees tend to focus on gaining knowledge, HNCs are designed to give you the skills to put that knowledge to effective use in a particular job.</p>	<p>Level 5 These qualifications are designed to equip you for a particular area of work – as well as giving you the general skills that are useful in any type of job. They're university-level qualifications, but are designed with work in mind, with the help of employers from that sector.</p>	<p>Level 6 These qualifications are designed to give you a thorough understanding of a subject. They help you develop your analytical, intellectual and essay or dissertation writing skills. You'll also have much more of a say about the direction your learning takes than you've had previously.</p>	<p>Level 7 These qualifications are of academic study. They can be research based, a taught course, or a mixture of both, and will take at least 12 months of full-time study to complete. You may also have to submit a dissertation at the end of your course.</p>	<p>Level 8 This level gives you the opportunity to undertake an original piece of research. It will usually take at least three years of full-time study to complete. Many doctorate courses lead to a qualification such as a Doctor of Philosophy – a PhD or Dphil.</p>
Qualifications that are available at this level	<p>Higher National Certificates (HNC)</p> <p>Foundation Studies (FS)</p> <p>Diploma</p>	<p>Higher National Diplomas (HND)</p> <p>Foundation Degrees (FD)</p> <p>Diploma of Higher Education (DipHE)</p>	<p>Bachelor Degrees (BA, BSc)</p> <p>Bachelor Degrees with Honours (BA Hons.)</p> <p>Professional Graduate Certificates in Education (PGCE)</p>	<p>Masters Degrees (MA, MSc)</p> <p>Postgraduate Certificates and Diplomas</p> <p>Post Graduate Certificates in Education (PGCE)</p>	<p>Doctoral Degrees</p>

PROGRAMME OVERVIEW

Foundation Degree Teaching and Learning Support

The foundation degree in teaching and learning support has been designed in consultation with a wide range of employers across the region in order to provide a stimulating and challenging employment-focused learning experience. As a student on the foundation degree in teaching and learning support you will develop a range of analytical approaches to support your personal development in the care of children and young people. You will also gain the necessary work based skills that are essential within the field of education and you will also be encouraged to develop a deeper understanding of the current issues affecting children's education.

The foundation degree in teaching and learning support requires you to be based within a relevant setting for at least one full day a week, which includes primary and secondary schools, special educational needs settings, behavioural settings, FE colleges, community learning or prison education. This essential work based experience, in addition to lectures and seminars will support the

development of your professional practice and ensures that you are up to date with the latest practice in schools, thus, supporting your level of employability.

BA Top Up Teaching and Learning Support

The BA (Hons) top-up is a response to the current needs of our students, employers and the industry sector and reflects the aspirations of many practitioners to gain higher level practical, managerial and technical skills, whilst at the same time enabling them to gain a higher educational qualification. As a student you will not only develop your skills in areas specifically related to the teaching and learning of children or young adults but will also ascertain knowledge in key higher level areas such as supervisory, managerial and training roles within the education sector, which creates a wide variation of career opportunities. Upon completion of the BA (Hons) you can choose a number of career pathways such as the standard qualified teaching route to behavioural, SEN or pastoral career pathways.

As a student you are encouraged to actively engage with the voluntary sector which is proving a rich source of experience in a range of disciplines within the broad range of education and associated sectors. This will not only support your learning at college but will also develop your level of understanding and will promote your level of transferrable and employability skills.

PROGRAMME AIMS

Foundation Degree:

- To provide the opportunity for the student to gain access to contemporary knowledge, skills and attributes directly related to teaching and learning support roles.
- To provide opportunities for students to appreciate the problematic nature of educational theory, policy and practice and to integrate and apply theories in practice.
- To develop digital and academic literacy skills in the production of a range of resources in a variety of communicative modes.
- To provide students with a variety of contexts in which to develop knowledge of reflective theory and apply this in practice.
- To provide students with the opportunity to explore the potential of technology in education contexts.

BA Top up:

- To provide students with the opportunity to explore intellectual, theoretical and ethical perspectives to illuminate understanding of education and the contexts within which it takes place.
- To explore the psychosocial and structural perspectives which inform professional practice in teaching and learning support.
- To develop in students the skills to critically evaluate the probable impact of sector developments, published research findings and new legislation on professional practice.
- To provide students with opportunities to consider the international and intercultural dimension of education, the effect of new technologies, and the impact of increased worldwide mobility.

PROGRAMME LEARNING OUTCOMES

Level 5

Upon successful completion of this level, students will be able to:

1. Identify the established principles of reflection and discuss practical applications in teaching and learning support practices.
2. Apply academic and digital literacy knowledge and skills to support lifelong learning and professional practice.
3. Evaluate National Core and Creative Curriculum frameworks and their application in practice.
4. Plan and design assessments for and of learning and relate these to professional work contexts.
5. Analyse and evaluate policies and legislation relevant to the teaching and learning support role.
6. Analyse professional support roles across the education sector and their interdependency and partnership approach.
7. Evaluate safeguarding and multi-agency practices applied in a work context.
8. Evaluate the potential for embedding learning technologies in and out of the classroom and their contribution to learner development and achievement.

Level 6

Upon successful completion of this level, students will be able to:

9. Critically examine underlying values, theories, perspectives and concepts relevant to teaching and learning support practice.
10. Critically analyse the assumptions which underpin theory and research in the education sector.
11. Critically apply knowledge of policy and legislation in order to make informed judgments and speculate on possible solutions.
12. Critically apply contemporary management and leadership theories in educational contexts.
13. Critically evaluate the impact of globalisation on educational systems, social justice, sustainable development and social inclusion.
14. Critically analyse multi educational support roles in the development and progression of learning and the inclusive curriculum throughout the education, welfare and social sectors.

PROGRAMME STRUCTURE & ASSESSMENT OVERVIEW

Pathway	Module	Level	Credits	Coursework	Practical	Written Exam
Stage 1: Year 1						
Stage exit award: LU Certificate of Higher Education						
(Awarded by Lancaster University)						
All	B4SHACTLS: Introduction to Academic Study (Mandatory)	4	20	60%	40%	
	TLS402: Support Strategies in Practice (Mandatory)	4	20	80%	20%	
	TLS403: Supporting Educational Professionals (Mandatory)	4	20	80%	20%	
	TLS404: Reflective Practice (Mandatory)	4	20	80%	20%	
	TLS405: English and Mathematics (Mandatory)	4	20	100%		
	TLS406: Assessment Design and Planning (Mandatory)	4	20	100%		
Stage 2: Year 2						
Stage award: LU Foundation Degree in Arts						
(Awarded by Lancaster University)						
All	BFC502-S: Work Based Research Project (Mandatory)	5	20	80%	20%	
	TLS502: Managing Behaviour (Mandatory)	5	20	100%		

	TLS503: Safeguarding (Mandatory)	5	20	100%		
	TLS504: Innovation and Creativity (Mandatory)	5	20	100%		
	TLS505: Pastoral Care (Mandatory)	5	20	100%		
	TLS506: Technology in Education (Mandatory)	5	20	70%	30%	

Stage 3: Year 3
Stage award: LU Bachelor of Arts with Honours
(Awarded by Lancaster University)

All	TLS601: Dissertation (Mandatory)	6	40	100%		
	TLS602: Socio-economic Factors Influencing Learning (Mandatory)	6	20	100%		
	TLS603: Psychological Aspects of Learning (Mandatory)	6	20	100%		
	TLS604: The Inclusive Curriculum (Elective)	6	20	100%		
	TLS605: Global Perspectives on Education (Elective)	6	20	100%		
	TLS606: Educational Leadership (Mandatory)	6	20	100%		

WHERE WILL I STUDY?

This programme may be studied at the following location:

B&FC University Centre

The majority of higher education courses are delivered at our University Centre in central Blackpool, within easy reach of student accommodation, shops, restaurants, bars and the promenade. This multi-million pound complex provides higher education students with a dedicated campus, with the major teaching and support facilities conveniently converging in an attractive central courtyard. The open-plan Central Hub houses a refectory, chill-out zones and the central learning resource centre. A unique and important addition to the Centre is our Gallery, housing works by both our own students and independent artists.

GETTING STARTED

At the start of your course, your tutors will guide you through an initial induction which is designed to ease you into university life and higher level studies. Activities generally focus on helping you to find your feet, make friends and plan your studies. It can also traditionally be the time when students get to let their hair down and familiarise themselves with both the College and the local area before getting down to the more serious business of studying.

Our annual Freshers' Fair is a fun, vibrant event and a great chance to find out more about what's on offer locally, with representatives from the B&FC Student Union, Higher Education Learning Mentors (HELMs), The Loop LRC, Careers Team and our Disability team who can provide information on Disabled Students' Allowances, access arrangements and reasonable adjustments. Representatives from local attractions, restaurants, health and fitness centres, clubs, bars and more will also be there. Support organisations and charities are represented too, along with B&FC's own clubs and societies and sports teams.

COURSE OPTIONS

Foundation Degree Teaching and Learning Support

The programme consists of 12 separate modules in total; which is split into 6 modules over level 4 and the remaining 6 modules over level 5. There are no optional modules within the foundation degree and each module has been developed to match the needs of the sector and draw on relevant job role requirements within teaching and learning.

The following modules will be delivered across levels 4 and 5:

- Academic and Digital Literacies
- Support Strategies in Practice
- Supporting Educational Professionals
- Reflective Practice
- English and Mathematics
- Assessment Design and Planning
- Work Based Learning
- Managing Behaviour
- Safeguarding
- Innovation and Creativity
- Pastoral Care
- Technology in Education

BA Top up Teaching and learning.

The programme is made up of 5 modules, the dissertation element of the programme equates to 40 credits and runs throughout the full year and the other 4 modules worth 20 credits. There are two optional modules you will be required to select 1 based on your interest and job role/own development. The optional modules have been developed to promote independent study increasing skill levels within your own research and own study development.

The following modules will be delivered across level 6:

- Dissertation
- Socio-economic Factors Influencing Learning
- Psychological Aspects of Learning
- Educational Leadership
- The Inclusive Curriculum (Elective module)
- Global Perspectives on Education (Elective module)

STUDY WORKLOAD

Foundation Degree/BA Top Up Degree

The programme will equip you to manage 3 on-going modules per semester; each module will consist of between 1 and 2 tasks. Managing your time between college work and your placement is imperative. The college partners for success can guide you, along with your progress tutors, and module tutors to devise a time management strategy to your learning. Independent research is required; we as a team recommend the library to facilitate the entire resources bank linked to the programme.

BA Top up Teaching and Learning Support

The BA-Top Up consists of 5 modules, 1 being your dissertation that spreads over each semester. 2 modules will be delivered within the first and second semester, it is key that you devise a well-structured plan with both your dissertation supervisor and progress tutor in order to utilise your time between your working life and college studies to ensure you as a student gain both the best college experience and grade profile.

LEARNING AND TEACHING

Foundation Degree Teaching and Learning Support

Teaching on this course will be through interactive lectures, seminars, workshops and online activities, building upon expertise acquired in the workplace. You will be encouraged to develop consistent methods of recording information, within a structured academic framework. Active participation is a key feature of the teaching and learning process. In particular, you will be expected to gather and record evidence in your placement/employment. Such participation is considered to be essential for the acquisition of transferable skills necessary for future study and employment.

BA Top up Teaching and Learning Support

Whilst lectures, seminars and practical workshops feature strongly in the teaching and learning strategy, we will be making considerable use of alternative methods of delivery and study, particularly online options such as tutor and self-assessment revision tests and formative exercises, power-point and other software-based lecture material, learning portals and hyper-linked resource-materials. You may expect therefore to participate in a wide variety of learning activities including; live and online projects, presentations and discussion alongside more traditional modes of delivery.

Your dissertation studies will be constantly monitored by your allocated dissertation supervisor who will be your critical friend throughout the module. One-to-one meetings will help you to manage your time and create personal timelines according to your own individual needs. Specific lessons via PowerPoint's, Q & A and discussions will also aid you to fully understand the dissertation process and what is required of you to complete the module to a high standard.

Independent Learning

All higher education programmes are designed so that you are able to progressively develop independent learning skills and aptitudes. Learning independently is a key skill of all graduates when they enter the work place and one which we aim to develop further during your time with us.

As you begin your programme you will be more intensively supported to develop the skills of learning and learning how to learn. As you progress you will be given the opportunity to apply these skills and to manage your own study time and activities with the goal of becoming a truly independent learner ready to get the most out of graduate employment opportunities.

Your Personal Development planning activities are a key component in developing these independent learning skills and your tutors, support mentors and peers can help you to organise and structure this aspect of your learning and development.

WORK BASED AND PLACEMENT LEARNING

Foundation Degree Teaching learning & Support - BA Top up Teaching and Learning Support

During your time on the programme you must be actively employed in a teaching and learning setting, either on a paid or voluntary basis, for an absolute minimum of 192 hours each year (equivalent to 6 hours per week over 32 weeks). This is to ensure that you have the opportunity to integrate theory into practice on a weekly basis and enables you to relate your work based experience to each module and its content. The work based element of the programme is seen as crucial to achievement of the qualification and supports you in gaining employment or promotion within the sector.

GRADUATE SKILL DEVELOPMENT

During the foundation degree and subsequent honours top up degree you will develop the necessary graduate skills and qualities required by the teaching and learning sector where personal responsibility

and decision making are key attributes for career progression. During your first year of study you will be required to apply the knowledge and theory from class within the workplace and this will be heavily linked to reflective practice and the benefits of being a reflective practitioner.

This first year of study will also develop your understanding of using effective communication skills and adjusting these for a variety of audiences including within the College environment and workplace. ICT is an essential skill within the workplace and college studies, your knowledge and understanding will increase during each assessment. The confidence gained due to this process will filter into your working role and allow you to use ICT with greater confidence and efficiency. Throughout the first year you will work on your digital literacies skills becoming more aware of the differing information streams available to you and your working practice, this will aid you to keep update within all aspects of your studies.

This will continue into the level 5 year of your studies where case studies will be used to stimulate problem solving and solution focussed ideas are proposed and debated in a deliberative academic environment. You will also have the opportunity to develop research skills at this level and this will be done in negotiation with the workplace to enhance an element of practice. During the process of research key elements of ethical research will be highlighted to ensure your work adheres to college policies. This will enhance your awareness of good ethical research and ensure you seek quality data/research with the new skill gained. Within your level 5 studies you will progress your independent learning skills, this will enable you to fully utilise your own working environment within your assignments and increase your productivity when self-directing your research and study time. Transferable skills will be gained in order for you as a graduate to have stability within your work life and enable you to be divers to new job opportunities/roles.

Research skills will be further developed at level 6 as a small scale research project is undertaken and primary research is used to analyse an aspect of the sector that has personal interest to you. You will also bring together an appreciation of educational, psychological and sociological theories where sustained and reasoned arguments can be constructed in a lucid and coherent manner.

Throughout the level 6 programme you will identify further roles such as special education coordinators and higher level teaching and learning assistants, this will give you a clear pathway to future education roles and create aspirations given your high level study skills. Further skills gained at this level will be the appreciation of globalization and the ability to review differing international curriculums to gain knowledge of good practice that then can be adopted and put into practice.

ASSESSMENT

Assessment

Assessment methods will reflect and support the programme aims and learning outcomes. They will, for example, reflect local application of national initiatives; offer the opportunity to reflect upon real work experience and practice, and encourage exploration of alternatives to received wisdom in the fields of pedagogy and andragogy.

Modes of assessment include:

Research projects to provide you with an avenue for engagement into research of a topic related to the teaching and learning sector that is of interest to you and your progression within the sector.

Reflective accounts are used throughout the foundation degree and the BA (Hons) top up to ensure that you clearly understand reflective theories and how they impact your personal, professional and academic skill development whilst on the programme of study

Essays will provide a platform highlighting essential links to research and crucial referencing skills.

Case studies are an integral part of the foundation degree assessment process; they ensure that skills and knowledge can be taken from real life examples that have influenced the education sector.

Presentations are an assessment strategy that reflects the nature of the sector you aspire to work in and assesses the ability to communicate information on an issue to an audience

Assessment Methods

Some assessments may already be very familiar, such as essays, exams, and reports. However, in higher education there are a great many varieties of assessment depending on the subject, the level and the type of course. Our higher education courses often integrate academic and work-based learning so assessment may include aspects of personal reflection, portfolio building and case studies. Here's a bit more detail about some of the more common types of assessment:

Essay

An essay is an answer to a question in the form of continuous, connected prose, usually with a word limit. Often these are set by the tutors but you may also be asked to formulate your own question with the tutor's help. Essays test your ability to organise your thinking, discuss, evaluate, analyse, summarise and criticise. They also test your skills at making essay plans and reaching a robust conclusion or decision.

Assignment or brief

An assignment or brief is a learning task that allows you to cover a fixed section of the curriculum predominantly through independent study. Different methods of presenting the results can be used dependent on the nature of the task - a report (oral or written), a design solution, a newspaper or magazine article, a video, a poster, a research bid, a book review, a contribution to a debate, etc.

Group project or assignment

This is where either an assignment or project is undertaken by groups of students working collaboratively, helping to develop team working skills and other graduate attributes. In some cases, particularly where the same thing happens in industry, there are particular assignments that can by definition only be achieved in a group. Such assessments will incorporate mechanisms which allow the tutor to assess the contribution of individual members of the group or team in order to allocate individuals with a personalised assessment grade.

Exams

Exams can take a variety of different forms, with the most common sort being done under timed and observed conditions to ensure it is the student's own work. Exams test your ability to think critically, to respond in a structured way to a question and to plan on the spot as well as your knowledge and understanding of the subject. Some of the most common types of exams are:

- 'Seen' where the questions to be answered are given at a pre-specified date beforehand. The intention is to reduce the need for 'question-spotting', to reduce the anxiety and to increase the emphasis on learning
- 'Open-book', where you will have access to specified texts and/or your notes. the intention is to reduce the emphasis on memorising facts, to reduce anxiety and allow more demanding questions to be set
- 'Unseen' where you don't know what the questions are until you sit the exam. Arguably these make you focus on the whole syllabus because anything may appear on the paper
- Multiple choice exams where you simply select from a bank of potential answers. These also assess your decision making skills

Logs and Portfolios

These are an increasingly popular kind of assessment, and involve a collection of all sorts of evidence of your work (often including others' testimony about your work, and feedback you've collected). Portfolios are intended to be a measure of the work of the 'whole candidate', rather than just particular aspects of the candidate's work. They also measure your ability to organise a collection of evidence, in a readable, navigable way. Not least, they test your ability to stick to deadlines with a big, multifaceted job.

Reports

There are many kinds of reports – laboratory ones, field-trip ones, business ones, and so on – each

has its own conventions and preferred formats – your tutors will tell you more. Assessed reports measure your skills at finding out about, and adhering to, the expected report formats and conventions in your subject discipline. They also measure your ability to put forward an organised piece of writing, coming to conclusions, making suggestions for further work, and so on. They often test your skills at interpreting data, making sense of your findings, and so on.

Calculations and problem solving

Usually given in sets – with a deadline for tutor marking, or to bring along completed to a tutorial. These, unsurprisingly, tend to measure your ability to solve problems and do calculations.

Presentations

Lots of students worry about presentations – you normally build up to these as your course progresses and you'll be given lots of support and time to prepare. You may be involved in group or solo presentations, perhaps to some or all of your class, usually with the tutor present. Sometimes peer assessment is used. Presentations measure your ability to talk fluently about a topic, and to answer questions from the group. They also measure your skills at preparing visual aids (overheads, handouts, PowerPoint presentations) to support your presentation. On some courses there are very few presentations. However, in the workplace, more and more people have to be involved in them, so practising on your course is a very good way of developing your skills.

Self and peer assessment

There is strong evidence that involving students in the assessment process can have very definite educational benefits. Not so much a type of assessment like those already listed, this is something which can be done in conjunction with any type of assessment. The important aspect is that it involves the student in trying to apply the assessment criteria for themselves. This might include: a marking exercise on 'fictitious' or previous years' student work; the completion of a self-assessment sheet to be handed in with your work; 'marking' a peer's work and giving them feedback (which they can then possibly redraft before submission to the tutor); or really marking other students' work (i.e. allocating marks which actually count in some way) - a seminar presentation, for example, or a written product using a model answer. The evidence is that through trying to apply criteria, or mark using a model answer, you will gain much greater insight in to what is actually being required and subsequently your own work improves in the light of this.

When will I be assessed?

In the majority of courses you will be assessed throughout your course and you will receive on-going feedback to help you develop academically. This is sometimes called formative assessment and is designed to help you learn as you go through your course. Some formative assessment is quite informal; it may be your tutor asking specific questions in class, for example. Other types of formative assessment can include written reports, essays, tasks for seminars etc., some of which are handed in so that written feedback can be provided. You will also be assessed summatively. This just means that in each module or unit, often at the end, you will complete work that is then graded, where the mark counts towards your final qualification.

At the start of your course you will be given an **assessment schedule** which details the deadlines for the assessments in all the modules you will be studying. This will help you to plan your work effectively. Your tutors understand that you have lots of commitments so will always try to spread the assessments out as much as they can, although inevitably many will come towards the end of each semester.

How will my work be marked and graded?

The majority of your assessments will be awarded a letter grade as outlined in the table below. Some of your assessments may however be assessed by percentages, which are converted into an aggregation score. Some assessments may also be identified as pass/fail assessments. Such assessments must be successfully passed in order to pass the module, however the aggregate score for the module will be derived from other assessments which are graded. Overall, you must achieve an aggregation score of 9 or above to pass a module.

Further information is available at: <http://www.blackpool.ac.uk/he-regulations>

Category	Grade	Aggregation Score	Grade Description
Excellent Pass	A+	24	Exemplary range and depth of attainment of intended learning outcomes, secured by discriminating command of a comprehensive range of relevant materials and analyses, and by deployment of considered judgement relating to key issues, concepts and procedures
	A	21	
	A-	18	
Good Pass	B+	17	Conclusive attainment of virtually all intended learning outcomes, clearly grounded on a close familiarity with a wide range of supporting evidence, constructively utilised to reveal appreciable depth of understanding
	B	16	
	B-	15	
Satisfactory Pass	C+	14	Clear attainment of most of the intended learning outcomes, some more securely grasped than others, resting on a circumscribed range of evidence and displaying a variable depth of understanding
	C	13	
	C-	12	
Weak Pass	D+	11	Acceptable attainment of intended learning outcomes, displaying a qualified familiarity with a minimally sufficient range of relevant materials, and a grasp of the analytical issues and concepts which is generally reasonable, albeit insecure
	D	10	
	D-	9	
Marginal Fail	F1	7	Attainment deficient in respect of specific intended learning outcomes, with mixed evidence as to the depth of knowledge and weak deployment of arguments or deficient manipulation
Fail	F2	4	Attainment of intended learning outcomes appreciably deficient in critical respects, lacking secure basis in relevant factual and analytical dimensions
Poor Fail	F3	2	Attainment of intended learning outcomes appreciably deficient in respect of nearly all intended learning outcomes, with irrelevant use of materials and incomplete and flawed explanation
Very poor Fail	F4	0	No convincing evidence of attainment of any intended learning outcomes, such treatment of the subject as is in evidence being directionless and fragmentary

What if I experience circumstances which mean I will not be able to complete an assessment?

The Personal Mitigating Circumstance (PMC) procedure gives you the opportunity to inform the College of serious medical or personal circumstances, which you believe, have affected your academic performance in an adverse way before the meeting of the Board of Examiners.

You may have had genuine and unavoidable circumstances that have affected your performance in coursework. These circumstances may have prevented you from being assessed or from submitting coursework on time. In all cases, it is important that you contact the HELM team at HELMinfo@blackpool.ac.uk to say that you are having difficulty completing work and are planning to apply for PMC.

A Personal Mitigating Circumstance Application Form must be completed by you and is available via the College website / Student Administration / Reception. It is your responsibility to complete and submit the form to the HE Student Administration Manager within 10 days of the assessment deadline.

You cannot request an extension to the assignment deadline date. Assignments must be handed in as soon as possible even if they are incomplete. If your PMC application is approved, you will be given an amended deadline and the opportunity to improve your work further.

For full details of this procedure please refer to: <http://www.blackpool.ac.uk/he-regulations>

What if I miss a deadline?

Managing your time effectively is a key graduate skill and you are therefore encouraged to plan your programme workload alongside your other commitments. If you fail to meet an assessment deadline, it will be penalised. Work submitted up to three days late will receive a penalty of one full grade and zero (non-submission) thereafter.

Deadlines are normally set on Mondays and Fridays to avoid the third day occurring at a weekend. Where the third day does fall on a weekend, students will have until 10 am on Monday to hand in without receiving further penalty. The penalties associated with the late submission of percentage coursework are outlined in the academic regulations for your programme.

For more information, please refer to: <http://www.blackpool.ac.uk/he-regulations>

What happens if I fail a module?

Most students pass their work, but if your mark for an individual module is less than the minimum pass grade you will be referred on that module. This means that you will have to be reassessed in the relevant work, however a second attempt will be subject to a penalty as specified within the academic regulations for your programme.

Where Personal Mitigating Circumstances are approved, this will typically prevent any penalties being applied and usually allow the work submitted to be marked as a first attempt.

Moderation

All work that you submit for assessment is marked by your module tutor. A suitable sample is then selected to be moderated by another tutor. This is to ensure that the mark awarded is reliable and not just the judgement of one marker. All of the work you submit is retained by the College to assist our external examiners in the quality assurance of your programme. This may mean that the results you receive during the year may change and should therefore be considered provisional.

External Examiners

Every higher education programme has its own External Examiner whose role is to support the academic staff team in ensuring that the standard of your programme of study is comparable to other programmes in that subject discipline. The External Examiner will confirm that the work that you have produced is of a standard that is expected and identifies any issues that the academic staff team needs to take into account to continually improve the programme. The External Examiner also feeds back on the key strengths that make your programme a really effective and valuable learning experience.

External Examiner reports for your programme can be requested by emailing highereducation@blackpool.ac.uk

Board of Examiners

Once a module is complete, the marks for all assessments are compiled together to create an overall module mark.

The module board of examiners sits at the end of each semester to consider modules in scope. Your overall marks for the year are considered by a programme board of examiners that will make recommendations regarding your progression between levels, reassessment and eventually the award of your qualification. The majority of programmes within the college run an academic year between September and June. Reassessment work will therefore normally be completed during the summer months and submitted by the end of July (the precise date is set by the board).

The board of examiners sits again prior to the start of the next academic year in September where the results of any summer reassessment work will be considered.

Where programmes fall outside of the standard academic year, the timing of the board identified above may vary, however the general process remains the same.

PARTNERS FOR SUCCESS

The Partners for Success framework has been developed from our considerable achievements and successful review outcomes in supporting students and ensuring that they are provided with the best possible opportunities to engage fully with their learning experience and the full life of the college. It outlines how staff, students and the wider college community work to provide a seamless network of support to enable all students to achieve their potential.

Studying at University level can mean quite a life change, particularly if you have to move away from home, juggle study with work or have caring responsibilities while studying. You may also be returning to study after a period away and feel unsure exactly what to expect. Most students new to higher level study also comment on the fact that it can be quite different to their previous studies.

Our central aim is to enable all students to become confident and competent independent learners and achieve to the maximum of their potential through the development of their academic skills, personal well-being, literacies and professional employability attributes.

- We will work in partnership with all stakeholders, students, staff and others to ensure and assure personal change and development through mutual expectations, mutual agency and clear communications.
- We will provide students with a network of support to enable their development and achievement of their personal, academic and professional goals

Key partners in your success are:

- Your Progress Tutor and the programme delivery team
- Careers team

- Student Support and Wellbeing including HE Learning Mentors (HELMS)
- Learning Resource Centre teams
- Student Union
- You!

Your Progress Tutor and the programme delivery team

Here at Blackpool and the Fylde College every student is entitled to receive tutorial support on their programme of study. Tutorials are an important learning activity; they give you the opportunity to engage in dialogue with your tutor on matters of academic progress as well as personal and pastoral issues which may impact on your learning experience.

The benefits of tutorials are that they help you to individualise your learning on programme and to receive constructive feedback on your work specifically and progress generally. Tutorials are an essential component of the B&FC Partners for Success framework which aims to enable your personal and academic development, and maximize your opportunities for success, through coordinating the range of support services available to you through your progress tutor. Tutorials can help you to critically engage with your subject in a way that you may not be able to do in lectures and other forms of learning. Your tutors will encourage creativity and originality of thought that will help you to gain a better understanding of the subject discipline helping you to achieve your potential and experience high levels of success.

You can ensure that you get the most out of tutorials by:

- Proactively seeking out information before the tutorial to prepare yourself for the discussion and dialogue
- Actively engaging in discussion with your tutor.
- Using the tutorial opportunity to ask questions of your tutor and engage in critical discussion.
- Receiving feedback and using this to plan your next piece of work or setting personal and academic targets for future learning activities

The Careers Team

University Centre

Located in the Foyer, ground floor, South Building

Tel. 01253 504474

Bispham Campus

Located opposite the main Reception area in the Hub

Tel. 01253 504298

Student Advisors

Student Advisers provide you with confidential and impartial information on a range of areas, and work to matrix quality standard to ensure excellence of support, advice and guidance to all our Students and prospective Students. Quick-query interviews usually last approximately ten minutes. For example, you might want to ask about job vacancies, for help with preparing for an interview, or advice on financial assistance etc. If you have a more complex query the Student Adviser will make a mutually convenient appointment with you for a longer interview. Careers Information Advice and Guidance and financial Help Group sessions also take place throughout the academic year.

Student Advisers also provide a drop-in service at all Blackpool and The Fylde College Campuses, so you don't need to book an appointment to see an Adviser.

Financial Help and Support

Student Administration can provide you with information and advice on access to help with transport, childcare and HE bursaries.

The Careers Team can help you if you find yourself in financial difficulties and will also help with advice and guidance regarding student loans.

Accommodation

Our Student Advisers can help you find student accommodation and provide advice on costs, and other expenditure i.e. rent bond, gas, electric, TV, phone, travel etc.

Careers Information, Advice and Guidance

The Careers Team are all highly qualified in careers information, advice and guidance and can help you with UCAS applications for entry to Higher Education, with making decisions about progression to other courses, job application, CV preparation and interview techniques alongside career and further training pathways and opportunities. Our team of professional Student Advisers are available to help you with all aspects of your career planning and decision-making, such as:

- Making decisions about your future career
- Planning your job search strategy
- Curriculum Vitae (CV) writing
- Getting relevant work experience - including volunteering
- Making applications and preparing for interviews
- Researching postgraduate study options

At Blackpool and The Fylde, our careers service extends far beyond helping you to pinpoint your ideal career. The emphasis is on tailoring a 'careers package' to your particular aims and aspirations that gives you the skills and experience needed to make you highly employable from the moment you graduate.

That's why all our degrees have a strong employment focus, with opportunities to try out your chosen career area, learn skills that employers are specifically looking for and practice interview and assessment techniques with representatives from industry. We also run an online job shop, backed up by a highly trained team of staff dedicated to making your career goals a reality.

You may be starting your course already clear about what you want to do when you graduate or you may not be sure at this stage. Our experienced and professional team of careers student advisers offer careers and progression advice to guide you towards making the right decisions about your future. Choose from e-guidance, telephone and face-to-face interviews within a small and supportive environment. We also offer pre-course advice and guidance. Underpinning all of this is a vast range of careers library resources together with access to internet-based resources, video resources and computer-aided guidance packages.

Enhancing your Employability

The opportunity for you to develop your graduate skills and attributes is built into all our courses to ensure you graduate not just with subject knowledge but with the ability to embark on your chosen career and hit the ground running. Our programmes also provide an opportunity to discover more about your chosen career area through visits from external speakers and trips to local employers and industry. Some programmes even contain a workplace learning module, where you'll get to spend time with an employer, putting your knowledge into practice and gaining valuable employability skills at the same time.

Getting Ready to Graduate

About a year before you're due to graduate we will invite you to take part in our graduate employability workshops, covering topics such as making the right career move, effective applications and successful interviews. In addition, local employers run mock interviews and facilitate role-play scenarios for students, which replicate the assessment centre experience for newly qualified graduates. These experiences are vital for developing an awareness of your strengths (and playing to them) and gaining an understanding of what graduate recruiters are looking for. Some of our students have even been offered a permanent position on the strength of them.

Grad Intelligence

B&FC in partnership with **Grad Intelligence** provide you with a Higher Education Achievement Report (HEAR) which will be published when you finish your degree.

An account will be created for you as part of your enrolment and you will receive an email to your student email account from accountregistration@gradintel.com, which will give you instructions on how to activate your account.

There is a range of psychometric tests and other tools available that can help you develop your employability skills. You can also create your own e-CV on the platform and access opportunities to search and apply for graduate jobs and/or further study.

HEAR (Higher Education Achievement Report)

The HEAR provides verified information about your academic and college verified non-degree related achievements.

You will be issued with an updated 'interim HEAR' annually in the summer, and a 'Final HEAR' will be issued when you graduate.

Engage with '**DegreePlus**' to evidence your employability skills and attributes to enhance your future employment opportunities.

DegreePlus awards will give you a head start as you enter the highly competitive graduate job market. Each award captures the additional activities you have undertaken which improve and develop your employability.

Gaining additional qualifications can help you stand out as someone who is passionate about professional development.

Student Support and Wellbeing

The Student Support and Wellbeing team offer a range of support tailored to you to promote independence and maximise your potential through a range of enhanced study, mental health and wellbeing strategies.

- Higher Education Learning Mentors (HELMs) email: helminfo@blackpool.ac.uk telephone 01253504494
- Disability Support: email dsainfo@blackpool.ac.uk telephone 01253504494
- Wellbeing self-referral form online at <http://www.blackpool.ac.uk/getwellbeingsupport>
- Wellbeing Support: email general enquiries wellbeingsupport@blackpool.ac.uk
- Support for care leavers, carers and students who do not have contact with their family: succeed@blackpool.ac.uk
- Safeguarding College Hotline 01253 504444 (9am to 4.30pm)

HE Learning Mentors (HELM)

The HELM team can support with aspects of student academic life, from settling into higher education, helping you gain and enhance study and digital skills and creating wellbeing strategies to work as independent learners. Examples of some of the study skills development and enhancement that we offer include:

- Improving your academic writing style.
- Grammar, sentence structure and developing expression.
- Critical and reflective writing.
- Information skills development, such as research, applying theory to your practice / study and referencing.
- Effective study techniques, planning, structuring and polishing assignments, time management and organisation.
- Revision and examination techniques.
- Digital literacy
- Support with Personal Mitigating Circumstances and Interruption of Study to help you get back on track and complete
- Keeping in touch support for Care Leavers, Carers and students with no family support contact.
- Signposting to other Partner for Success services

In addition to individual support, HELMs deliver a range of study and wellbeing skills through workshops including the 'Flying Start' and 'Flying Further' programmes. These are designed to complement the knowledge and information gained from your course. If you wish for the HE Learning Mentors to deliver a workshop for you liaise with your tutor or direct with the HE Learning Mentors team.

For help, advice and information:

- Phone: 01253 504494
- Email: HELMinfo@blackpool.ac.uk
- Drop in: to the University Centre South Building Entrance

SUCCEED is Blackpool and The Fylde College's package for Higher Education care leavers, carers and students who do not have any contact with your family, we can support you.

We offer you help with:

- Finance including application for B&FC Access Scholarship. For further information of all B&FC financial support visit the following link <https://www.blackpool.ac.uk/support/funding/degrees>
- Assignments and exams
- Wellbeing
- Signposting to other services

In addition we offer regular contact, one-to-one support with a named HELM to help you stay on track. For more information on support and eligibility.

For help, advice and information:

- Phone: 01253 504494
- Email: Succeed@blackpool.ac.uk
- Drop in: to the University Centre South Building Entrance

Disability Support

We understand everyone has different needs and some students with disabilities, sensory loss, learning differences, medical and/or health conditions (including mental health) or Autistic Spectrum conditions may need additional support to get the most out of College life. Student Support and Wellbeing offer a range of support tailored to you to promote independence. We work closely with your curriculum teams, supporting accessibility and inclusion.

There is specialist support available to help you succeed at studying with your declared condition. If you are able to provide evidence from a suitably qualified professional (please see below for examples), Exam Access Arrangements and support via the Disabled Students' Allowances (DSA) can help reduce many potential barriers.

Conditions and evidence required

Disabilities or long-term health condition

A photocopy of a report or letter from your doctor or consultant - you can also fill in the [disability evidence form from your Funding Body \(PDF, 65KB\)](#)

Mental-health condition

A photocopy of a report or letter from your doctor or consultant - you can also fill in the [disability evidence form from your Funding Body \(PDF, 65KB\)](#)

Specific learning difficulty like dyslexia

A photocopy of a 'diagnostic assessment' from a practitioner psychologist or suitably qualified specialist teacher

Support with gaining diagnostic evidence

If you do not have medical evidence of your condition, or a report available, we can offer advice on how to obtain this and in most cases provide funding.

If you are moving locally to Blackpool for the purpose of your study, you may want to consider temporarily transferring your health support to ensure cover for medication/prescriptions and referrals to local support groups. To find a local GP you can use the national NHS link <https://www.nhs.uk/Service-Search/GP/LocationSearch/4>

Disabled Students' Allowance

DSAs are Student Finance grants that pay directly for extra Assistive Technology and Specialist Support (out of class) that may benefit you as a direct result of your medical/health condition. Visit the [DSA pages](#) on the UK Government website to learn more about the application process.

B&FC offer (subject to eligibility) the Advantage Bursary or hardship funding to cover the £200 contribution cost of a computer as part of the DSA.

Examination Arrangements

Exam Access Arrangements are pre-examination adjustments put in place for you based on your individual need, for example, readers, scribes, rest breaks. You will need to refer yourself to Student Support and Wellbeing for exam access arrangements for approval prior to your exams.

Final dates for evidence to be received and assessed for exam access arrangements:

Semester One exams- 31/10/19

Semester Two exams- 28/2/20

General Support

Campus Access:

Visit [AccessAble](#) website for access information for our campus sites. This includes details of B&FC facilities.

Wellbeing Support

The Wellbeing Service at Blackpool and The Fylde College offers a wide range of support, including wellbeing and short term counselling appointments, interactive workshops and support to access self-help resources.

To access support from the wellbeing team, please complete the [wellbeing referral form](#).

Responses to this form are monitored twice a day (9-4pm) from Monday to Friday during term time.

Please note that this is not an emergency service. If you are concerned about your safety or the safety of someone else call your **GP, NHS 111** or attend **Accident and Emergency** at Blackpool Victoria Hospital.

Visit the [Wellbeing area](#) on SharePoint for more information and guided self-help.

Visit the Contemplation rooms for quiet meditation, prayer or just 'time out'.

The Contemplation rooms can be found at:

- Bispham Campus - C307 - Third Floor Room - Cleveleys Building
- University Centre - SB130 - Second floor Room - South Building
- Fleetwood Campus- Room A33 Ground Floor- Halls of Residence
-

To use the contemplation rooms, visit the main campus reception and sign for the room key.

For help, advice and information:

- Phone: 01253 504494

- For general enquiries please email wellbeingsupport@blackpool.ac.uk
- Drop in: to the University Centre South Building Room 26c)

Need help now?

B&FC Safeguarding - If you feel unsafe or at risk at College contact your tutor or the Student Direct Safeguarding College Hotline: 01253 504444 (9am-4.30pm). If you require advice or assistance about disclosing a safeguarding concern you should discuss this with your Progress Tutor or any member of staff.

If you feel you are at risk of harm to yourself or others and need immediate help, contact the National Health Services (NHS) such as your GP or alternatively ring 111 as soon as possible, if you are in an emergency situation ring 999 or go to Accident and Emergency (24 hour) Victoria Hospital Whinney Heys Rd, Blackpool, FY3 8NR and request a mental health assessment.

Alternatively go to your nearest Walk in Medical Centre:

- Whitegate Health Centre, Blackpool, FY3 9ES
- Fleetwood Health & Wellbeing Centre, FY7 6HP

Need to Talk?

Support is also available externally from the following organisations:

Mental Health Helpline Freephone 0800 915 4640. <http://www.lancs-mentalhealthhelpline.nhs.uk>

Samaritans (24 hour) Freephone 116 123 <http://www.samaritans.org>

HOPELINE - Call: 0800 068 4141, Text: 07786209697 or Email: pat@papyrus-uk.org (10am – 10pm weekdays, 2pm – 10pm weekends and bank holidays)

LEARNING RESOURCE CENTRE TEAMS

Whichever campus you study on, the Learning Resource Centres (The Loops) will play an important part in your studies. Our flexible learning spaces can provide you with a mixture of computer, group work and quiet study areas. You should make maximum use of this facility to log-on to a PC, access printing and copying facilities or ask the Resource Advisers for help and advice.

You will have access to a wealth of information through a wide range of physical and online resources such as e-books and full text journal databases giving 24/7 support for your academic work. Our online search tool Discovery is available for you to search for high quality, relevant journal articles to support your studies. Our online catalogue - <https://libcat.blackpool.ac.uk> - is also available 24/7 allowing you to check reading lists, reserve titles, renew borrowed items and provide direct links to the titles in our extensive eBook library. We can also provide material from other libraries through our inter library lending scheme.

Our teams are always happy to offer help and advice. They have in-depth knowledge of your subject area and can support you in finding good quality research material, as well as developing your IT and research skills through one-to-one sessions. Interactive support materials are available through the Learning Resources area on the virtual learning environment, Canvas. More information about The Loops, including the opening hours for each centre, can also be found on the [college website](#)

Term time opening hours

The Loop at UC
 Monday – Thursday 8.30 – 21.00
 Friday 8.30 – 17.00
 Saturday 10.00 – 15.45

Email: CentralLoopLRC@blackpool.ac.uk
Telephone: 01253 504414

The Loop at Fleetwood

Monday - Thursday 8.15 – 19.45
Friday 8.15 – 17.00
Saturday 10:00 – 15.50
Email: lrcfle@blackpool.ac.uk
Telephone: 01253 504714

The Loop at Bispham

Monday – Tuesday 8.30 – 17.00
Wednesday 8.30 – 20.00
Thursday - Friday 8.30 – 17.00
Email: lrcbis@blackpool.ac.uk
Telephone: 01253 504290

Self-issue / return facilities are available in the Bispham, Fleetwood and University Centre Loops. There are drop-in IT-based facilities with networked computers (including Macs in the Loop at UC) and wireless laptops, colour printing and scanning facilities. In addition, the Loop teams can help you get connected to the Wi-Fi and other college systems. Help with IT issues is available through an online HelpDesk.

You can access computing and copying facilities at any campus, if this is more convenient for you when engaged in independent study, but the majority of course specific materials will be located in the Loop on the campus where your course is based.

You will find the essential texts for your course available in the library stock and these are regularly updated. Relevant journals and online resources are purchased on an annual basis. For all Higher Education courses you will have access to online reading lists via the Keylinks software. These online reading lists directly link you to the core eBooks and print resources in the library catalogue, thus enhancing their accessibility.

Following an initial Welcome Tour of your local Loop, your tutor will arrange for us to work with you in follow-up in-depth sessions on key skills such as effective searching of online resources and referencing. Induction sessions are also provided at the start of your programme to help you find your way around technology in the college. Additional one-to-one tutorials are available to all students. LRC support is supplemented by a range of interactive resources on Canvas.

The services provided by the Learning Resources Centre will be an integral part of the Induction Programme for this course.

Information Technology Resources

Being able to access resources and materials to help you on your course when you need them is very important. Canvas is our virtual learning environment, and contains lots of key information about your course and is accessible 24:7. As part of your induction we will make sure you are able to make the most of this resource.

As a student at Blackpool & the Fylde College you will be provided with a web-based Microsoft Office 365 account. This account provides anytime, anywhere access to a suite of Microsoft programmes including Outlook email and web-based versions of Word, Excel and PowerPoint. You also get access to your own online storage area so you can download, edit and save your college work wherever you are.

Included in your Microsoft Office 365 account is access to our MyDay portal. The portal provides you with access to your calendar (including timetables), email and links to the VLE and eTrackr. Timetable data is updated every hour so you can see all room changes. It is accessible from a web browser and

as a mobile device app on Apple and Android devices. MyDay will be launched automatically whenever you login into a College desktop computer.

To find your course materials, log-on to the VLE, the College's virtual learning environment. The VLE contains lesson notes, multimedia materials, quizzes, forums and lots of different tools to help you achieve your academic goals. You may submit your assignments through the VLE and receive online feedback from your tutors. The VLE also provides easy ways for you to communicate with your tutors and fellow students using messaging, chat rooms and forums. You can access your Office 365 and VLE accounts by logging into one simple webpage MyDay which also contains useful college information, news and links:

<https://blackpool.mydaycloud.com/dashboard/home>

Induction sessions are provided to all students at the start of their course to help you find your way around technology in the college. 'The Loop' LRC's are located on each campus. You can pop into The Loop and log-on to a PC, access printing and copying facilities or ask the Resource Advisers for help and advice.

STUDENT UNION

The Students' Union (SU) at B&FC is *your* union. It's made up of students that *you* elect each year, who listen to the student voice and respond to *your* wants and needs. The SU represents students on a range of issues, including equality and diversity, education and social activities, with the aim of ensuring your time here is as interesting and enjoyable as possible.

As a student at Blackpool and The Fylde College, you are automatically free members of the Students' Union and you are encouraged to play an active role. Our Students' Union is actively engaged in student affairs at local and regional levels so there are opportunities for you to become involved in various campaigns and fund-raising activities. Our aim is to work for the good of the student community and to take an active interest in the development of all students. As such the Union represents the students on a number of academic and College committees where student involvement and comment is welcomed.

The Union provides the framework and financial backing for students to organise trips and events, which can be a great way to broaden your interests and meet new people. With a wealth of information, our Students' Union can also advise you on places to go and things to see and do.

If you need to get in touch, you can contact your Student Union Sabbatical Officer by phone or email.

B&FC Student Union Sabbatical Officer

Tel: 01253 504 517

Email: studentsunion@blackpool.ac.uk

BEING A PARTNER IN YOUR OWN SUCCESS

Higher education is as much about personal change and development as it is about subject knowledge and skills development. By facilitating your development we enable you to take responsibility for your own learning. Students who are fully informed about the opportunities available to them, but who are also aware of their responsibility to engage with those opportunities, are more likely to make effective use of services and resources. It is important that you take advantage of every opportunity to facilitate your success, and to creatively engage with the knowledge you encounter, constructing and reconstructing your own understanding. We will support you to set clear goals, reflect on your progress and develop key graduate skills.

ABSENCE REPORTING

If for whatever reason, including ill health, you are going to be absent from College then you will need to ensure that you make contact with us to discuss how we can support you. This is particularly important if your absence could have a significant effect on your assessment requirements. Should this be the case then you will need to consider the College Personal Mitigating Circumstances procedure the full version of which is available at the link below.

<https://www.blackpool.ac.uk/he-regulations>

Any personal mitigating circumstances, such as ill health, which may have affected your studies or performance in assessments and examinations, would need to be submitted to the HE Student Administration Manager mitigating.circumstances@blackpool.ac.uk formally by you with supporting evidence, e.g. a medical certificate, following the procedures and in accordance with the deadlines laid down in the College's Personal Mitigating Circumstances Policy.

In the event that you are unable to attend an examination because of illness or other unforeseen circumstances, you must immediately inform your programme leader before the start of the examination. If you are absent from the whole or part of an examination because of illness, a Personal Mitigating Circumstances application form together with a valid medical certificate or other appropriate independent documentary evidence must be forwarded to the HE Student Administration Manager normally within ten working days of the examination.

STUDENT IDENTITY CARD

You must wear your ID badge at all times whilst on College premises. Access to College facilities is dependent on Students having their ID badge. You will also be asked to show your ID badge when sitting exams. You will be challenged if you are not wearing your badge when on College premises. This is to help students and staff feel safe in College.

FOOD ON CAMPUS

When you want to take a break for refreshments on campus, you're well catered for. At the University Centre's Central Hub refectory, **Café Grads**, you can sit down and tuck into a proper meal or just grab a bite and relax in one of the chill-out areas. A **Starbucks** outlet has also just opened in South Building.

A similar-style refectory, **Retreat**, is available at our Bispham Campus or if you fancy a little treat there is also a range of freshly made sandwiches and smoothies in the **Grab and Go** and a **Starbucks**. At the Fleetwood campus the **Refectory** offers traditional breakfast, a wide range of hot food, sandwiches, snacks and beverages. Visit <http://www.blackpool.ac.uk/facilities/shops> for more information. At all our campuses, there are also plenty of vending points providing snacks on the go.

Get off to a great start every morning! All Blackpool and The Fylde College students are entitled to a free healthy breakfast.

SPORTS FACILITIES AND COLLEGE TEAMS

Sports facilities are mainly based at the Bispham Campus where there is a sports hall, an all-weather floodlit sports pitch and a well-equipped gym. Our Fleetwood campus has sports facilities. We have numerous College teams, both men's and women's, with other available sports ranging from volleyball and five-a-side football to table tennis and canoeing. To find out more ask your progress tutor.

ENRICHMENT

Enrichment is about providing you with opportunities to bring your learning to life, developing your range of interests, meeting new friends and growing as a person. Some activities will be related to your

area of study whilst others may not be directly linked. More information is available in your Partners for Success Guide; via the Students' Union and through your progress tutor.

Curriculum-based activities

Whilst studying your chosen subject at College, you will have the chance to see how your subject works in real life and apply that insight to your studies. We also aim, during your programme of study, to develop your employability skills and interview techniques. To provide this valuable enrichment, your programme may feature such activities as guest speakers, trips into industry and overseas visits, 'real life' assignments, competitions, work experience and work placements (some of which can lead to permanent positions).

Extra-curricular activities

College is also as much about the social side as it is about learning. At Blackpool and The Fylde College we offer a vast range of activities, from discounted theatre trips to lunchtime sports activities and book club. Activities are free to everyone enrolled on a course and in most cases, there's no need to book. For more information about what's on check your Partners for Success Guide; visit the Students' Union website or speak to your progress tutor.

Fee-based activities

For those of you who wish to engage in a further range of activities there are fee-based sports activities.

The Enrichment Team can also organise one-off fitness activities, such as trips to Manchester's Chill Factor for skiing or outings to Grizedale Forest for mountain biking. For more information please visit the Students' Union website or contact the Enrichment Team on 01253 504134.

GETTING INVOLVED IN THE QUALITY OF YOUR PROGRAMME

At Blackpool and the Fylde College we believe that you are a member of our higher education and College community and as such your views and experiences are extremely important to us. We want to work in partnership with you to ensure that your experience is the best that it can be both for you and others who study with you. To this end we work hard to engage all students in dialogue about the quality of their learning experiences. You can engage by providing useful feedback on your experiences of modules through Module Evaluation Questionnaires, through being an elected course representative attending student forums and college meetings and through surveys such as the Post-induction survey and the National Student Survey (NSS).

The MEQ (Module Evaluation Questionnaire) surveys give students a chance to put their views across relating to modules and progress meetings during the academic year. You will be asked to rate questions around various themes such as Teaching and Learning, Assessment and Feedback, Organisation, Resources and Facilities, Student Voice and Overall Satisfaction, as well as to make individual comments if you wish. We can use what the results tell us that you like, or don't like, to make changes and improvements to our HE programmes, as well as look at how we compare with other similar colleges.

ACADEMIC APPEALS

An academic appeal is a procedure which allows you in certain circumstances to ask for a review of a decision relating to your academic progress or award. You can ask for a review of a decision by one of the following:

- A Board of Examiners, both Module and Programme Boards.

- A Personal Mitigating Circumstances Panel
- An application to the College
- An Academic Malpractice Panel

It should be noted that students may only appeal against a decision if they can show that they satisfy one or more of the grounds detailed in the academic regulations. The appeal process cannot be used to challenge academic judgement or appeal simply because you disagree with the marks you have been given.

An academic appeal is different from a complaint so appeals and complaints are looked at under different procedures. A complaint is dissatisfaction about the provision of a programme or academic service or facility or any other service provided by the College.

Students studying either a:

- **Blackpool & The Fylde College Programme**
- **Lancaster University Validated Programme**
- **Liverpool John Moores Validated Programme**
- **Scottish Qualifications Authority Programme (SQA Higher National)**
- **BTECHigher National Programme**

To lodge an academic appeal, you must do so by submitting your appeal within 10 working days of the publication of your results or decision of a panel either by writing to the HE Academic Registrar, Bennett Avenue, Blackpool, Lancashire, United Kingdom, FY1 4ES or by email to: appeals@blackpool.ac.uk

The Academic Appeals regulations and application pro-forma can be found on The Blackpool & The Fylde College website <https://www.blackpool.ac.uk/he-regulations>

COMPLIMENTS, COMPLAINTS AND FEEDBACK

Blackpool and the Fylde College welcomes feedback from all its students and is committed to improving the quality of the services it provides; we are committed to openness and transparency by providing well publicised and accessible information on how to give feedback or make a complaint.

Compliments, complaints and feedback will be dealt with courteously, fairly and objectively.

We hope that you will never have cause to do so but if you wish to raise a complaint (or you wish to compliment us or provide feedback) please take a look at our Compliments, Complaints and Feedback Procedure which is located on our website here: <https://www.blackpool.ac.uk/college-policies>

GRADUATION

Our annual higher education awards event is a spectacular occasion, representing the culmination of masses of dedication and hard work, and the gateway to an exciting and rewarding future. The graduation ceremonies will take place at the Winter Gardens and Opera House, 97 Church Street, Blackpool, Lancashire, England FY1 1HL.

Your graduation day may seem a long way off now, but you will be there quicker than you think! Blackpool and the Fylde College's Awards Ceremonies are a part of the celebration of your achievement and we hope you will be able to attend. You will need to budget for the cost of guest tickets, academic dress and photography. Awards Ceremonies are held each year at the Winter Gardens. If you attend the Awards Ceremonies we publish the names and awards of all graduates in the Awards Ceremony booklet and in a graduation supplement in the local press. If you do not wish your name to appear, you must contact Student Administration to inform us. We will print the name we

have recorded for you on your degree certificate, so it's important that you tell us in advance of any spelling or other changes. After we have printed the certificate we will not be able to change it for you.

This is a very special day for all our graduates and their friends and families and is a marvellous opportunity to share and celebrate your academic achievement and accomplishments.

MODULE OUTLINES

The following module outlines provide you with a brief overview of the modules and their contents, together with the intended learning outcomes.

B4SHACTLS: Introduction to Academic Study Level 4 - Mandatory

Module Abstract

This module aims to give you specific knowledge, skills and understanding required for successful higher education study and engagement with industry. It will draw explicit attention to the introduction and / or development of such skills; encourage you to consider your approaches to learning and enable opportunities for discussing multiple perspectives of your subject and wider related issues.

You will become familiar with identifying your own values and experiences and applying these to case studies and examples of practice. You will develop the strategies and understanding needed to find, interpret and evaluate academic sources, theories and models in order to compare approaches to your subject and form new ideas.

The module will provide opportunities to communicate your developing knowledge and awareness of own values in terms of academic research both formally and informally, requiring you to express your ideas verbally, in writing and digitally.

A key focus of the module is the importance of academic practice when communicating your interpretations of subject specific material. Formative and summative activities will provide you with a sound basis for expressing ideas, solving problems and analysing perspectives related to industry in a style and format appropriate for higher education. This will include structuring a written piece of coursework, adhering to standards such as word count, referencing effectively and evaluating secondary sources.

Learning Outcomes

- 1 Find, interpret and evaluate a range of digital and traditional sources to produce written communication that meets academic expectations of higher education.
- 2 Analyse data sets to produce graphical representations of data OR analyse a case study to identify and discuss theoretical perspectives, models and research.
- 3 Produce verbal presentations appropriate to audience and level of complexity.

Indicative Content

Academic Writing
- Conventions
- Terminology
- Paraphrasing
- Summarising
- Reports / Essays

- Referencing
- Academic integrity

Secondary Research

- Use of digital and traditional tools for discovery; open access journals
- Referencing and in text citation, plagiarism, reliability and validity of sources
- Comparison, contrast and critical evaluation
- Critical reading and note making

Data Collection

- Interviews
- Focus groups
- Observation
- Questionnaires / Surveys

Data Analysis

- Statistical analysis Mean, median, mode, standard deviation, correlation
- Accuracy, precision, error and uncertainty
- Reporting data (graphical methods, tabular grouped vs ungrouped etc.)
- Interpreting data (confidence intervals and p values)

Reflective Practice and Writing

- Models of reflection

Critical Reflections

- Academic formality voice / academic, personal and professional

Presentations

- Selection of relevant points
- Communication of ideas verbally / visually

TLS402: Support Strategies in Practice **Level 4 - Mandatory**

Module Abstract

The module will introduce you to the principles of inclusive practice and will enable you to appreciate the importance of inclusivity and inclusive approaches to education within your setting. As you progress through the module you will develop knowledge and understanding of the principles of equality and the expectation that these be applied to every child. You will explore language, transience, learning and behavioural difficulties which can lead to an individual being excluded from learning. The module will explore current policies and strategies relevant to inclusive practices and will enable you to evaluate the effectiveness of inclusive educational practices in contemporary settings. You will identify disability rights such as health and well-being to ensure your studies are taking a holistic view point of local and wider reaching provisions.

You will explore how inclusive education practices have shifted from a focus on the individual to take account of familial, social and cultural contexts and the impact this has on funding and support provided. You will examine the concept of inclusivity in relation to wider and more diverse social groups such as refugees, asylum seekers, high achieving pupils and looked after children. The relationship between inclusive and anti-discriminatory practice will be examined in order to highlight the value of adopting an inclusive approach to educational support.

You will analyse your work setting and investigate the support services that are available through education networks examining what the services provide. You will create a booklet of services that are involved in the promotion of inclusive practice in settings and will investigate financial, social, physical, cognitive and emotional barriers to inclusivity. Through reflective activities you will evaluate current

legislation and strategies for inclusion and locate inclusive practices relevant to your setting.

Learning Outcomes

- 1 Identify and discuss individual learning needs within education settings.
- 2 Discuss services which promote inclusive practice.
- 3 Evaluate current legislation and inclusive strategies that promote equality within practice.
- 4 Explore the barriers that occur within education settings identifying research that recommends the enhancement of inclusive practice

Indicative Content

Learning needs

Inclusive practice and contemporary issue

Anti-discriminatory practice.

Equality and diversity

Current Legislation and strategies

Learning difficulties and disabilities

Looked After Children

High achieving pupils

Barriers to support

Transient communities

Refugees, asylum seekers

TLS403: Supporting Educational Professionals Level 4 - Mandatory

Module Abstract

This module, will encourage students to develop understanding of and appreciate the importance and diversity of roles, responsibilities and contexts of teaching and learning support staff in educational settings. As the workforce within the education sector is continually evolving and changing due to the differential needs of children and young people, legislation and policy; it is important to recognise that teachers and teaching assistants are professionals with different but equally important roles to play. Due to the Governments drive to raise standards within all schools, the role of support staff has increased in diversity and scope. This reflected in the range of tasks that are required to be carried out in order to support learning and behaviour in the classroom. Students will therefore explore how this role is classified and viewed within a wider context, for example from the perspective of Government legislation and policy whilst also considering the views and expectations of teaching staff, parents, children and young people.

Learning Outcomes

- 1 Discuss the academic and behavioural support needs and characteristics of children and young people
- 2 Identify the skills, qualities and competencies required to work in a support role within the teaching and learning sector
- 3 Analyse roles and responsibilities of teaching and learning support professionals
- 4 Examine relevant statutory regulations and/or policies that impact on the role of the education support professional

Indicative Content

Skills and qualities of Educational Support Assistant, counsellors and mentors

Responsibilities of Educational Support Assistants – supporting pupils, teachers, school and curriculum

Distinction between teachers and supporting educational roles

National Occupational Standards

Legislation and policy

Referral Units and colleges of Further and Higher Education

Team working

Multi-agency working

Reflective practice

TLS404: Reflective Practice Level 4 - Mandatory

Module Abstract

This module will introduce you to the purpose of reflective writing within your education setting. You will evaluate the need for support staff & teachers to incorporate reflective practices as part of their professional activities and operations. You will explore the need to develop reflective skills in order to complete the reflective cycle successfully.

You will analyse theories of Schon, Brookfield, Borton and Kolb improving your skills to incorporate their theories into writing. As you progress you will develop your knowledge and understanding of the purpose of reflection and learn how to apply the process to individual situations. You will develop these skills to reflect systematically on the effectiveness of the teaching and support strategies.

You will evaluate your practice and be committed to make improvements to practice through appropriate professional development. You will analyse your work based setting and identify areas for improvement or enhancement within your own practice which will be recorded in a piece to camera. Through reflective activity you will evaluate your practice and your own continuous professional development and identify areas for improvements documented in a reflective journal.

Learning Outcomes

- 1 Reflect on areas of your own practice using established models of reflection.
- 2 Evaluate the purpose of reflective writing in the education setting.

- 3 Analyse your work based setting and identify areas for improvement/enhancement.
- 4 Discuss continuous professional development in relation to your practice.

Indicative Content

Reflective Theory: Schon,1987; Brookfield,1995; Borton,1970; Kolb, 1984.

Skills to reflective writing

Continuous Professional Development

Improvement/enhancements to practice

Using reflection as a basis for improving learning and teaching

TLS405: English and Mathematics Level 4 - Mandatory

Module Abstract

This module will address contemporary issues related to the delivery of both English and Mathematics in 21st Century classrooms. This module will enable students to consider and apply current curriculum frameworks for both English and mathematics will be examined and students will develop their planning skills and identify and develop appropriate assessment strategies for each subject. In addition, students will consider potential barriers to both English and mathematics development and achievement within both primary and secondary settings and how teaching and learning strategies can be differentiated to meet the needs of all individuals in the inclusive classroom.

Teaching in the 21st Century requires practitioners to have a robust skillset in relation to ICT and therefore students will consider both the positive and negative influences of technology upon the delivery of both English and mathematics

Learning Outcomes

- 1 Design, implement and evaluate a practical resource for either English or Mathematics within a relevant setting.
- 2 Discuss relevant curriculum frameworks for planning, implementing and evaluating a chosen core subject resource.
- 3 Compare and contrast historical and contemporary approaches to teaching and learning of both English and mathematics.
- 4 Appraise the effectiveness of ICT within the teaching and learning of both English and mathematics.

Indicative Content

Planning and assessment processes

English and mathematics frameworks

Differentiated teaching and learning strategies

Barriers to delivery of English and mathematics

ICT and English and mathematics.

Lifelong learning

Practical applications of mathematics

Compare and contrast English curriculum

TLS406: Assessment Design and Planning Level 4 - Mandatory

Module Abstract

The content of the module explores and underpins practice relating to the design and construction of planning and assessment, drawing on professional, personal and academic strategies. Aspects of teaching are explored and evaluated in relation to your practice within an education setting. You will have the opportunity to consider different theories of learning and how they impact on a student. You will consider how to develop methods of planning and assessment with a particular focus on the use of forward thinking to ensure every student achieves their potential. In addition to this the use of summative and formative assessment methods will be identified and considered in conjunction with your own professional development.

Learning Outcomes

- 1 Reflect on formative and summative assessments within own teaching setting
- 2 Identify theory in relation to benchmarks within education
- 3 Evaluate the relationship between theories of learning and practice
- 4 Explain the preparation and planning processes that link to teaching pedagogy/andragogy.

Indicative Content

Purposes of assessment

Assessment theory

Current assessment practice

Pedagogy/Andragogy

Assessment within collaborative professional practice

The reliability and validity of assessments

Current influences on the statutory assessment process in schools

Forward thinking

BFC502-S: Work Based Research Project Level 5 - Mandatory

Module Abstract

This module will provide you with the opportunity to explore current methodologies which underpin research activities; research design, data collection instruments and data analysis. You will be able to pursue a research interest which is related to your work context which will support your understanding of professional strategies, operations and activities in context. This is an investigative module which will develop your skills in ethical understanding, research conduct and practices and enable you to generate conclusions which are evidence based. You will be supported to use your academic and digital literacies to research secondary published data relevant to your chosen area of investigation as well as collecting primary data sensitively and ethically in the field. This module will support you in developing the research and enquiry skills required for lifelong learning, employability and further under and post graduate study.

Learning Outcomes

- 1 Plan, design and implement ethical secondary and primary data collection.
- 2 Analyse and reflect on secondary and primary data in order to draw conclusions.
- 3 Evaluate the process and outcomes of research activities.
- 4 Communicate the outcomes of the research project to selected audiences.

Indicative Content

Using secondary sources of data

Research proposals

Research paradigms – positivist, interpretivist, critical.

Quantitative and qualitative data

Research designs

Sampling and generalisability

Ethical practice

Data collection instruments: Design, pilots, construction

Quantitative and Qualitative Data Analysis

Drawing conclusions from research

Communicating the outcomes of research

TLS502: Managing Behaviour
Level 5 - Mandatory

Module Abstract

This module will develop your appreciation of behaviour including sociological, psychological, biological and environmental perspectives. Attachment disorder, levelling, impact of disabilities and family dynamics will be investigated and you will explore the notion that a child/adult relationship is complex and that a holistic approach to all children/adults should be taken to ensure positive behaviour is achieved. You will develop a range of classroom management strategies which will inform your practice and assist the development of skills when managing challenging behaviour including the use of technology to support behaviour management.

The module will identify current policies and procedures within all education settings highlighting differentiation where appropriate, e.g. Mainstream to SEN schools. Key roles within education will also be explored, roles such as Educational Psychologist, Special Educational Needs Coordinator (SENCO), mentors and you will identify and discuss their impacts on behaviours in and out of the classroom.

Learning Outcomes

- 1 Analyse the behaviour of learners in relation to theoretical constructs.
- 2 Critically analyse a range of strategies to support learners who present challenging behaviour drawing on theory to inform practice.
- 3 Explain and recommend suitable behavioural and emotional strategies for learners.
- 4 Evaluate behaviour specialist practices in relation to issues influencing classroom behaviour

Indicative Content

Influences on behaviour

Labelling

Behavioural difficulties

Practical strategies for dealing with conflict

Individual differences

Differences in family patterns

Impairment/disabilities – physiological and emotional

Environmental factors – geographical and social

Psychological factors –motivation and character

Observation theories – Implementation and good practice guidelines

The use of technology in behavior management

**TLS503: Safeguarding
Level 5 - Mandatory**

Module Abstract

This module will introduce you to the subject of safeguarding and explore the procedures adhered to in the education settings. You will examine evaluate policy and legislation and consider the implications this has on making informed decision in professional practice.

The module will enable you to consider the importance of recognising the signs and symptoms of abuse and the impact this has on a child/young person's learning and educational outcomes. You will analyse current safeguarding practices and evaluate your professional responsibilities in protecting children and young people.

The module will examine the factors involved in serious case reviews and explore historical high profile

cases that have shaped current safeguarding practices. You will develop your knowledge and understanding of the impact the failings identified in these cases had on individuals and evaluate the importance of acting appropriately when working with vulnerable children and young people.

Learning Outcomes

- 1 Explain models and theories of child abuse and neglect.
- 2 Analyse the development of current legislation policy and procedures
- 3 Evaluate case reviews and holistic multi-agency working practices
- 4 Evaluate safeguarding procedures and policies in practice within education settings.

Indicative Content

Child abuse and neglect

Theories and models of safeguarding

Education policies

Safeguarding principles and practices

Legislation

Professional boundaries

Serious case reviews

Historical safeguarding case reviews

Building professional resilience

**TLS504: Innovation and Creativity
Level 5 - Mandatory**

Module Abstract

Creativity is about production of novelty, making something new and original or taking an old perspective, position or object and seeing it through new eyes. It is the effective implementation of pedagogical strategies used to facilitate learning and in turn encourage autonomous Innovation which is an essential element of development; these two concepts have the potential to drive professional teaching and learning support practices in creating engaging and effective learning experiences for children and young people. Throughout this module, you will be able to develop your skills and abilities to teach creatively and understand how being creative in the classroom can lead to higher attainments, greater achievements and an increased enthusiasm to learn. Being creative and innovative helps people adapt to their environment in a rapidly changing world. The module content will address a variety of creative skills including inquisitiveness, problem solving, curiosity, imagination and open mindedness.

Learning Outcomes

- 1 Plan creative activities and review the impact on a specific educational setting
- 2 Investigate how creativity and innovation are fostered in children and young people

- 3 Analyse theories and models of creativity and creative practice in educational contexts
- 4 Critically evaluate the impact of creative practices on educational outcomes

Indicative Content

What is Creativity?

Promoting Creativity through your own teaching – planning and assessment

Fostering Creativity through creative teaching and learning

Models of Creativity

Theories of Creativity

Assessing Creativity

Flow

TLS505: Pastoral Care Level 5 - Mandatory

Module Abstract

This module considers the principles of multi-agency working and analyses the partnerships which are developed between professionals and between professionals and parents, and the impact this has on relationships with learners in their care. In order to promote resilience, a necessary and important factor in supporting the educational futures and outcomes of children and young people, consideration will be given to the exploration of strategies to support mental health and wellbeing. The module focuses on the work of multi-disciplinary teams and how this affects learning and development. The module content will also consider how policies and procedures for partnership working are formed, developed, maintained and sustained to achieve positive outcomes.

Communication streams, mediums and messages and their effect on building positive relationships when working with children, families & other professionals will be explored. The module will also provide you with the opportunity to study parental influence from a sociological perspective and consider which aspects of parental influence have the most impact upon learning and development.

Learning Outcomes

- 1 Analyse and discuss a given role in the multi-agency approach to working with families and other professionals
- 2 Discuss challenges and opportunities of multi-disciplinary team working
- 3 Identify strategies for developing and sustaining positive relationships with families and other professionals
- 4 Analyse the complexity and practices of parent / professional and parent / family relationships

Indicative Content

Professional relationships

Parental Influence

Communication strategies

Models of partnership working

Roles in multi-disciplinary teams

Economic, social and cultural influences

Mental Health and resilience

TLS506: Technology in Education Level 5 - Mandatory

Module Abstract

This module will focus on the importance and development of technology in education and will enable you to analyse how this impacts on your professional practice and the achievements of children. The use of technology, especially in education, has changed rapidly over the last decade and this module will identify those changes and highlight the impact this has had on the education of young people. This module should be seen as an opportunity to evaluate and analyse the use of technology in a professional setting in relation to children's attainment, developing home and school links and with reference to the delivery of core subjects. You will be required to observe the ways in which technology is utilised in your setting as well as identify ways in which technology can be a help or a hindrance to a child's educational development. With the rapid advancements in technology it is crucial that you remain current within your practice and have awareness of new initiatives, products and programs that become available to assist in the teaching and learning sector and in your own professional practice.

Learning Outcomes

- 1 Discuss educational technologies implemented in educational settings and evaluate their effectiveness
- 2 Evaluate the impact of technology on educational development, attainment and the learning experience
- 3 Evaluate the potential of educational technologies in supporting the development of language and communication.
- 4 Analyse the relationship between technology and inclusive practices

Indicative Content

The use of technology throughout core subjects (English and Mathematics)

Assessment and the impact of technology

Technology, staff self-assessment and staff-development

Creating digital home and school links

The use of mobile technology and applications (apps)

Using technology to form the classrooms of the future

Technology and inclusion

Technology and behaviour

The impact of technology on attainment

Benefits of Social Networking in Education

E-Safety, safeguarding and ethical considerations

TLS601: Dissertation Level 6 - Mandatory

Module Abstract

This module will enable you to demonstrate the application of the analytical, investigative and evaluative skills developed during the course. You will have opportunity to pursue issues in depth and undertake your own research with limited supervision. You will be provided with the opportunity to examine issues from a range of perspectives and established theoretical frameworks in explaining behaviours and needs of students within the teaching and learning sector.

You will be supported to plan, and produce a written dissertation where you will apply specific knowledge in order to make informed judgments and speculate on possible solutions.

This module provides you with the opportunity to develop primary and/or secondary research skills and apply these to a research study. Furthermore it aims to enhance skills in critical analysis, reflection and evaluation to enable the formulation of ideas and the development of valid conclusions and recommendations. As a significant piece of independent work, the dissertation provides the opportunity for you to communicate ideas effectively and professionally in written formats thus developing significant transferable skills. Finally the dissertation encourages the development of self-management and independent learning through the planning, operation and completion of an extended piece of work.

Learning Outcomes

- 1 Propose a relevant area of investigation and formulate a research proposal appropriate for treatment, relevant to the subject discipline
- 2 Provide a critical review of relevant literature and related concepts to form an effective framework for the study
- 3 Plan and carry out an ethically sound research investigation with limited supervision within which appropriate methodologies and analytical techniques are applied to the investigation.
- 4 Clearly communicate the nature, rationale and outcomes of the enquiry, drawing valid conclusions and/ or making logical recommendations.

Indicative Content

Choice of research topics

Research design

Ethical considerations

Literature reviews

Methodology

Data presentation and analysis

Conclusions and recommendations

TLS602: Socio-economic Factors Influencing Learning Level 6 - Mandatory

Module Abstract

In this module you will consider how economic social and cultural disadvantages impact on teaching, learning and educational outcomes. You will examine sociological theories and perspectives of social stratification address issues of inequality and explore the relationships between disadvantage, educational achievement and life chances. It is likely that local and national strategies will endeavor to enact change for educational attainment and you will be encouraged to debate and critically assess these changes as they impact on practice.

The impacts of social, economic and cultural disadvantage are brought into the classroom setting, this impacts on learning and development and as teaching and learning support practitioners you will be expected to understand these impacts and develop strategies for both identifying educational development issues and responding to them. The module will consider topics such as lack of opportunity, access to education, marginalisation and social exclusion and will provide you with an understanding of social theory policy and practice.

Learning Outcomes

- 1 Critically analyse the sociological theories and models of social and economic disadvantage
- 2 Critically assess the impact of socio economic disadvantage on achievement and lifelong opportunities
- 3 Analyse educational settings to identify patterns of social disadvantage
- 4 Evaluate government policy and strategies designed and implemented to address social disadvantage in education and society

Indicative Content

Theories of social disadvantage

Social Policy

Socialisation

The impact of social disadvantage

Poverty

Equality and Diversity

Stratification

Inclusion

Legislation

Professional practices

Marginalisation and social isolation

Local and National Changes to Strategies

TLS603: Psychological Aspects of Learning **Level 6 - Mandatory**

Module Abstract

This a module that focuses in depth on psychological principles of how an individual comes into being examining individual differences, social psychology and cognitive and affective development.

Psychological perspectives, models and theories will be explored enabling you to integrate your practical work based experiences to established and emerging theory.

This module will link the study of psychology and education and will enable you to apply psychological theory and research to real-life settings, especially those involving children and young people in a diverse range of educational contexts, providing you with a unique understanding of the links between the two dynamic disciplines of education and psychology.

Two themes run throughout this module; the first is a strong psychology theme covering a range of topics including cognitive, behavioural, social, developmental, and biological aspects of psychology. The second theme focusses on building an understanding of education and educational contexts, leading to an informed perspective on how psychological theory and research intersects with education in a wide range of settings.

Learning Outcomes

- 1 Critically evaluate psychological theories and perspectives of child and adolescent development
- 2 Integrate and apply psychological theory to educational contexts
- 3 Critically analyse the impacts of child and adolescent development on educational outcomes
- 4 Critically evaluate the extent to which psychological research and theory aids understanding of educational attainment

Indicative Content

Psychological theories of child development and socialisation

Learning and Behaviour

Learner development and socialisation

Moral Development

Social Learning theory

Abnormal psychology

Individual differences

Pro-social and antisocial behaviours

Disengagement and exclusion

TLS604: The Inclusive Curriculum **Level 6 - Elective**

Module Abstract

The module will further develop your understanding of the inclusive curriculum and the diverse range of educational settings to which inclusive practice relates.

The module will further enhance your knowledge of working with inclusive curriculum practices and how you support individual learners in your setting.

You will critically review and evaluate current and historical legislation and contemporary practices related to inclusion identifying support services available. From this critical review you will focus on the reforms implemented to support inclusive practice.

You will explore inclusive intervention techniques and strategies used to support learners with differing needs. You will also analyse the roles and responsibilities of professionals working in inclusive settings and those who support inclusive practice. Professionals in the sector now need to expand their role to include both health and care planning as a part of their responsibilities and you will examine this in the light of changes in the sector. A multiagency approach to incorporating health and care into inclusive educational practice will be explored in order to examine how supporting individual needs impacts on educational development.

Learning Outcomes

- 1 Critically evaluate the historical developments, current legislation and reforms relating to inclusive practice
- 2 Explain the barriers which can prevent inclusive practices taking place and make recommendations to overcome such barriers.
- 3 Critically evaluate early intervention techniques and contemporary strategies used to support inclusivity.
- 4 Critically evaluate theories and perspectives of inclusion highlighting legislation, policies and practices which support the individual

Indicative Content

Education system and the services available for intervention.

Government legislation and contemporary practice

Historical development of inclusive education the reform of the system.

Intervention techniques and strategies used to support learner needs

Roles and responsibilities of professionals within the education, health and care planning

The advancement of the multiagency approach to universal services

European inclusive practice

Barriers to collaborative working

Personal reflection on inclusion in work-based setting

TLS605: Global Perspectives on Education
Level 6 - Elective

Module Abstract

The module will provide an insight into the various approaches to education globally adopted into practice with an international comparative perspective; examining different countries and considering the wide variety of cultural similarities and variations in approach. It will take into account the wider political, societal and economic perspectives of the country and how these impact significantly on the provision of education.

The module will critically analyse comparative practices involved in providing early years education and to evaluate the religious and cultural connotations that are intrinsically linked to delivery of service. The provision will be considered from all national, voluntary, charitable and independent providers

You will evaluate education policy development; both in the UK and the wider international arena, taking into account the economic and political stability of countries. You will consider the long term aims and impacts of policy initiatives on national and international populations and the factors affecting service delivery

Learning Outcomes

- 1 Critically evaluate the impact and perception on education and curricula
- 2 Analyse and critically evaluate political and economic factors which impact on international approaches to education
- 3 Compare and contrast professional practice in the UK with international perspectives.
- 4 Critically evaluate international cultural and societal norms and their impact on education

Indicative Content

Cultural variance

International approaches to early years curricula

Cross- Cultural ethical issues

National and international political agendas

The impact of economic stability on provision

Religious and cultural connotations

Differentiation in international professional practice

TLS606: Educational Leadership
Level 6 - Mandatory

Module Abstract

For this module you will be introduced to the knowledge, skills, qualities and attributes required to lead and manage effectively in educational settings, leadership is a key performance indicator when considering the overall success of settings. The purpose of this module is to encourage you to explore the role of leadership and management in practice within education settings and identify and analyse potential barriers to successful leadership and management in educational organisations.

You will be encouraged to consider current theoretical models of leadership and management critically evaluating their implementation. Management and leadership will also be examined through a human resources lens and you will develop understanding of how these principles are applied in practice. This module will also explore the concept of collaborative working which exists between colleagues working

towards the same overall values and principals of the setting and will explore the interplay between practitioners and managers and leaders in educational settings.

Learning Outcomes

- 1 Critically analyse management and leadership theory in the context of leading practice in an early years setting.
- 2 Critically evaluate how the role of senior leadership teams has evolved and the influence this has on the organisation as a whole.
- 3 Analyse and evaluate the strategies and barriers for effective collaboration, networking and teamwork in the wider community context.
- 4 Critically examine the importance of coaching, mentoring and role modelling as essential skills for leading practice in educational settings.

Indicative Content

Legislation and policy development

Theories and approaches to leadership and management

Team development

Team dynamics

Coaching and mentoring

Barriers to effective leadership and management

ADDITIONAL COSTS

A DBS is mandatory for the placement element of the programme, however the college is not compelled to pay for this so in some cases you may need to cover the cost of the DBS.

EQUIPMENT REQUIREMENTS

There are no additional costs associated with studying this programme.

STUDENT PROTECTION PLAN

The B&FC [Student Protection Plan](#) sets out the measures that we have put in place to protect you as a student in the unlikely situation where a risk to the continuation of your studies arises. Our plan has been approved by the Office for Students and is available on our website

<https://www.blackpool.ac.uk/info-for-he-students>
